

Section 4 : Means of Implementation

Chapter 38

International Institutional Arrangements

Inter-governmental follow-up and development of the findings of UNCED needs to primarily be within the framework of the United Nations. To achieve this, the United Nations needs to be restructured and revitalized to become more effective and responsive.

Objective

To integrate environment and development issues at all levels.

Activities

The General Assembly of the United Nations needs to undertake a regular review of Agenda 21. Input from the Economic and Social Council, the establishment of a Commission on Sustainable Development, and a high level advisory board of experts on environment and development are required to achieve this.
